

## MODELING AND RENDERING OF REALISTIC FEATHERS

### ABSTRACT OF THE DISCLOSURE

5           The present invention provides a systematic  
method for rendering feathers. In one aspect, a  
segment of a rachis having a first barb and second  
barb is generated. The first barb is generated based  
on a first barb length and the second barb is  
10 generated based on a second barb length.
